

Here's the Autism Increase facts as presented on Buergerwelle's website:

I knew that it had gone up from 1 in a 1000 in the 80s to several out of every 100 children in the early 90s but this just shows that the continuing increase in ambient radiation that has occurred in the 90s has made this situation even more and more severe.

It's like "wake up out of your unconsciousness, people! Stop living in denial! Stop thinking that change doesn't start with you!"

I find it amazing that people just don't care about their own health or the health of the planet, but even more amazing that they are willing to let their children's brains be fried just because of a stupid and selfish need to use their radiation boxes - i.e. cell phones - and WiFi. I know people find it "convenient" but so was Chernobyl

[Autism Increase](#) Statistics From the Department of Education annual reports to the US Congress

(Children with a diagnosis of autism aged 6-21] served by IDEA

(Individuals With Disabilities Education Act)

In round terms, for every two children registered through IDEA with autism in 1992-93, there were almost eleven by 1999-2000
