Dear Carolyn,

I am pleased to let you know that I have evaluated the Bioelectric Shield and am extremely impressed with the results I have noticed. It appears to be an excellent tool for not only improving one's sense of well being but also providing substantially more energy. The pendant also protects against the dangers of electromagnetic fields (EMF's) as shown upon testing with advanced electro-acupuncture equipment that I have used. In my twenty-two years of practice as a Chiropractic physician, I have not been as excited about something that an individual can wear that successfully not only improved one's overall feeling of health and energy but even reduced pain. I will enthusiastically recommend the Bioelectric Shield and its remarkable properties that affect the bio-electric fields of the body and reduce the effects of EMF's to my colleagues. As a faculty member at Palmer College of Chiropractic West, I will also recommend the unit to students to broaden their base of health management modalities in addition to anyone who wishes to increase their level of energy and also to reduce the effects of stress.

Very sincerely,

Ronald S. Dunn, D.C.
